MANAGEMENT DISCUSSION AND ANALYSIS

Financial Results

For the period under review, the Group's unaudited profit attributable to equity holders of the Company amounted to HK\$90.1 million, representing 3.35 times of that of the corresponding period in 2016. Amongst these, HK\$12.6 million (2016: HK\$4.8 million) came from the Group and HK\$77.5 million (2016: HK\$22.1 million) was the contribution from the Group's associated companies. The substantial aggregate increases in the fair value gains from the Group's and its associated companies' investment properties for HK\$56.6 million and the significant improvement in the exchange difference for HK\$5.0 million as a result of the recent strength of the exchange rate of RMB/HK\$ were the major factors leading to this favourable interim results. Further, our Rental Business and realized profits from the sales of certain properties of the Group and its associated companies out-performed that of the last corresponding period for HK\$1.1 million and HK\$0.5 million respectively. Finally, interest income was HK\$0.6 million higher than that of the last corresponding period.

Business Review

Property Development, Investment and Management

During the period under review, our Rental Business performed well and led to an improvement of after-tax profit for HK\$1.1 million.

During the period under review, an associated company had acquired 1 residential unit in Yau Ma Tei. On the other hand, two associated companies had disposed of 1 industrial unit in Tsing Yi and 1 industrial unit in Fanling respectively. The aggregate profits derived by the Group therefrom were HK\$2.5 million whereas the realized profits in the last corresponding period were HK\$2.0 million.

Subsequent to the period under review, an associated company had entered into agreements to dispose of 2 industrial units in Fanling and the contributions from these sales were approximately HK\$3.5 million.

Apart from the aforesaid, the Group did not acquire or dispose of any property during the period under review and up to the date of this report.

Investments

For the period under review, the after-tax profit from the Group's investment portfolio was HK\$0.4 million lower than that of the last corresponding period. However, the effective better deposit interest rates achieved by the Group had a favourable effect on the interest income of the Group. The interest income recorded during the period under review was HK\$0.6 million greater than that of the last corresponding period. It seemed that the downside pressure on RMB was relieved and an improvement in the exchange difference by HK\$5.0 million was recorded during the period under review.

MANAGEMENT DISCUSSION AND ANALYSIS (Continued)

Prospects

For the period under review, the local economy had shown steady improvement. The 3rd Quarter GDP and private consumption growths in real term were 3.6% and 6.7% respectively. The seasonally adjusted unemployment rate was relatively stable and stood at a level of 3.0%. Notwithstanding gradual improvement was seen in the local economy, inflation was at a relatively low level and the year-on-year change for Composite Consumer Price Index was 1.4% for the month of September 2017. The total exports, from the inception of this financial year, had exhibited positive growth over that of the last year. In September 2017, a positive growth of 9.4% was recorded.

Globally, the United States had taken steps to rectify the undesirable situation brought about by the quantitative easing measures carried out in the previous years. In addition to raising the interest rates for two times, the Federal Reserve had scheduled plans to achieve balance sheet normalization. The plans raised will, though moderate in pace, in the long run lead to tighter money supply and finally higher interest rates will be resulted. Since HK\$ is pegged to US\$, a corresponding local interest rate hike is expected. The European Union is undoubtedly adversely affected by the refugee problem, the Brexit in Great Britain and the independence issue in Spain. Furthermore, the nuclear crunch posed by North Korea and the attitudes adopted by the United States and her allies will be an important topic. The persistent controversies in the South China Sea may still be a difficult situation that China has to deal with. The "One Belt, One Road" policy advocated by China may add momentum to economic growth and sustainable development. Hong Kong, being the largest off-shore Renminbi centre and capable of providing sufficient legal and professional expertise, may be able to grasp the emerging trading and commerce opportunities.

In Hong Kong, local challenges both in economic and political fronts may limit its economic growth. Following the balance sheet normalization process and the onset of interest rate hike in the United States, liquidity in the global economy is expected to tighten which, in turn, may give rise to instability in the international and local financial markets. It is also difficult to predict the economic developments in China. Special attention will be paid to the property markets in which the Group operates. Hong Kong property prices stand at record high. By critically assessing and evaluating its investment portfolio in real estate in Hong Kong, the Group may consider possible rationalization and adjustments of the composition of such portfolio so as to create and enhance shareholders' value. The Group will act with prudence and caution in order to cope with the challenges ahead.

Employment and Remuneration Policies

As at 30 September 2017, the Group had less than twenty employees and their remuneration is maintained at competitive levels. Total staff costs (including Directors' remuneration) amounted to HK\$3.4 million (2016: HK\$3.2 million). Remuneration policies are reviewed regularly by the Board and by the Remuneration Committee regarding Directors and senior management. Employees' salaries are determined on performance basis with reference to the market trend. In addition, discretionary bonuses are granted to eligible employees with reference to the Group's results and individual performance. Other benefits include education and training subsidies, medical and retirement benefits and paid leaves.

Liquidity and Financial Resources

The Group is virtually debt-free and generally finances its operations with internally generated cash flows. The Group's short-term bank deposits and cash and cash equivalents amounted to HK\$1.7 million and HK\$262.4 million respectively at 30 September 2017. The Board believes that the Group has sufficient financial resources for its operations. The Group has no material exposure to foreign exchange rate fluctuation and material contingent liabilities.
